## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2155

A new title more aptly descriptive of the invention claimed is requested.

Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to all independent claims, it is not seen how matches can be determined if only fragment instead of the entire address/number is compared with a stored one.

The followings have no clear antecedent basis:

1. "the user" in line 7-8 of claim 1. Other independent claims have similar defect.

Claims 6 and 8 are not understood. Claim 6 is confusing. Comparing claim 6 with the last step of its parent claim 1, it is not seen why the saved address/number which already has been cached is being cached again. In claim 8, it is not clear what a distribution list is. Other claims have similar defects. See claims 12, 14, 19, 24 and 29 for examples.

In claim 9, there is no functional relationship between the second step and other steps.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paul (USP 5,999,932).

See at least the abstract and columns 1 and 2 of Paul. Paul teaches:

A method and apparatus for processing email in a sending device, comprising:

Receiving an email address;

Cross-referencing the address (lines 9-13 of column 1) with a stored address to determine whether the address is stored in a database;

Automatically update the database by storing the address in the database if the address has not been previously saved.

The only difference is that Paul's method and apparatus are for updating addresses of incoming messages instead of addresses of outgoing messages. It is the position of the Examiner that it would have been obvious to a person of ordinary skill in the art to use the teaching of Paul for updating addresses of incoming messages so that a list of incoming message addresses is maintained for sending future messages.
